

CKGSB BCI

January 2020

20 January 2020

CKGSB Case Center and Center for Economic Research

In January, the CKGSB Business Conditions Index (BCI) registered 56.2, signifying a leap in confidence since December, in which the BCI scored a dismal 49.8. (Figure 1).

The CKGSB BCI comprises four sub-indices: corporate sales, corporate profits, corporate financing environment and inventory levels. Three measure future prospects and one, the corporate financing index, measures the current climate. In January, these sub-indices performed as follows:

Figure 2 Corporate Sales Index

Figure 3 Corporate Profit Index

Source: CKGSB Case Center and Center for Economic Research

This month, three rose and one fell. The corporate sales index rose from 64.0 to 72.1 (Figure 2), and

the corporate profit index rose from 48.6 to 60.0 (Figure 3).

Figure 4 Corporate Financing Index

Figure 5 Inventory Index

Source: CKGSB Case Center and Center for Economic Research

This month's corporate financing index rose from 37.8 to 43.3 (See Figure 4).

The inventory index, in contrast to the positive trend, dipped to 47.9 from 49.6 (Figure 5).

Aside from the main BCI, we also forecast costs, prices, investment and recruitment demand over the next six months. We begin with costs:

Figure 6 Labor Costs Index

Source: CKGSB Case Center and Center for Economic Research

Figure 7 Overall Costs Index

Source: CKGSB Case Center and Center for Economic Research

This month's labor cost forecast made striking progress, rising from 76.4 to 84.7, and the overall cost forecast remained high at 80.6 (December: 79.3). No matter how the economy is performing, these two indices indicate consistently high costs over the long term (See Figures 6 and 7 for specifics).

Turning to prices, the consumer price forecast were stable, rising half a percentage point from 53.0 to 53.6 (Figure 8), suggesting the impact of African swine flu has been contained. The producer price index rose significantly this month, registering a 10.7 point hike from 43.0 in December to 53.6 in the new year (Figure 9).

We now turn to investment and recruitment. These two indices have been consistently at the more confident end of the scale since the BCI began. In the past few months however, both have strengthened. This month, the investment index rose somewhat, registering 62.6 in December and 64.4 in January (Figure 10), while the recruitment index increased from 60.3 to 61.9 (Figure 11).

Finally, we include an index recording our sample's relative strength in the marketplace. Figure 12 shows surveyed companies' level of competitiveness over time. As our sample mostly comprises of CKGSB alumni firms, we can be assured that their competitiveness is higher than average (50 points) for their respective industries. This means that Chinese industry as a whole will be experiencing tougher conditions than our sample.

CKGSB BCI Introduction

In June 2011, the CKGSB Case Center and the Center for Economic Research initiated a project to gauge the business sentiment of executives about the macro-economic environment in China – calling it a business conditions index.

Under the direction of Professor Li Wei, the two research centers designed and tested the BCI survey in July 2011. In September 2011, the first survey was carried out. 98 surveys have been completed in total and 93 monthly reports have been published between May 2012 and January 2020 (There were three months at the beginning for which no report was issued).

Explanation of the Index

The CKGSB Business Conditions Index (CKBCI) is a set of forward-looking diffusion indicators. The index takes 50 as its threshold, so a value above 50 means that the variable that the index measures is expected to increase, while a value below 50 means that the variable is expected to fall. The CKGSB BCI uses the same methodology as the PMI index.

The survey asks senior executives of companies whether their main products are for consumers or non-consumers, and then asks how they think product prices will change in the next six months. Based on survey responses, we have been able to report expectant changes in consumer and producer prices.

We ask companies for information pertaining to their relative competitive positions in their respective industries. Based on survey responses, we compute a competitiveness index for our sample. The higher the competitiveness index, the more competitive our sample firms are in their respective industries.

Method of Calculation

During each survey, respondents are asked to indicate whether certain aspects of their business (e.g., sales) are expected to increase, remain unchanged, or decrease over the forthcoming six months as compared to the same time period last year. The diffusion index is calculated by summing the percentage of “increase” responses and half of the “remain unchanged” responses.

Of all the indices measured for the CKGSB BCI, the overall business conditions index is an aggregate index, which has been calculated, since December 2012, by averaging its four constituent indices of sales, profit, financing environment and inventory. The aggregate BCI index before December 2012 used a different composition of constituent indices, and is therefore not directly comparable to the current BCI index.

About Cheung Kong Graduate School of Business

Education for a New Era of Global Business

Established in Beijing in November 2002 with generous support from the Li Ka Shing Foundation, CKGSB is China’s leading non-profit, independent educational institution. The school offers innovative English MBA, Chinese MBA, Executive MBA and Executive Education programs. In addition to its campus in the center of Beijing, it has teaching sites in Shanghai and Shenzhen and representative offices in Hong Kong, London and New York.

Thought Leaders on Business in China

CKGSB faculty, through their on-the-ground research and close relationships with leading domestic executives, provide global thought leadership on both the theory and the practical reality of real-life business in China. They consistently generate important insights into areas that are poorly understood outside of China, such as the globalization strategies of Chinese companies and competition and collaboration among state-owned enterprises, private businesses and multinationals.

World-Class Faculty with a Global Perspective

CKGSB is the only business school in China with the reputation and resources to attract faculty from top business schools such as Wharton, Stanford, NYU and INSEAD. The majority of CKGSB faculty members were born and raised in China before leaving to study and teach abroad. Their bicultural backgrounds have endowed them with a valuable capacity to interpret global business in the context of both China and the West.
